

## One Technology

The Lockheed Martin building is located in the University of New Mexico Science & Technology Park. This 65,000sf office building has a precast concrete exterior. Its interior has extensive daylighting, a two-story atrium with a glass-backed elevator and stone flooring in the lobby.

The building is designed to accommodate a wide variety of user agencies for Sandia National Laboratories and the Department of Energy. Floor to floor elevations are 14'-0" to allow future flexibility for office layout and technology. Conference rooms are equipped with teleconferencing capabilities.
